About Vmoto
 Vmoto is a wholly-owned Australian motor cycle brand specialising in hi tech 50cc motor scooters. Vmoto's state of the art production facility is situated in the Peoples' Republic of China where the scooters come off the production line of the world's largest motor cycle factory.

The factory contracted to build Vmoto scooters was chosen because of its stringent step-by-step quality control systems, impeccable attention to detail and world class research and development facilities.

All Vmoto scooters carry full volume compliance having passed the Australian Design Rules (some of the most stringent in the world) with flying colors and are built to the exacting standards required for harsh Australian conditions.

Vmoto's philosophy has been to bring scooters to the mass market by making them affordable, ultra stylish and hassle-free with class-leading reliability.

Vmoto's GLOBAL headquarters and distribution centre is located in Perth, Western Australia.

Features
 The number one selling 125cc scooter in Australia for 2004, and it was only released in December!

Invade the road with the sleek styling of the Monaco V1. Boasting a gutsy 125cc 4 stroke engine the V1 is definitely not a toy.

Standard equipment on this beast is anything but, with a remote alarm/immobiliser as well as remote starting. When you combine all of this with the front disk brake, telescopic front forks and an adjustable rear shock absorber you have one of the leaders of the pack - the Monaco V1.

Search for a Vmoto Dealer or read the technical specifications.

Monaco \$2990.00*

Servicing and Warranty
 All Vmotos are covered by a factory-backed 12 month unlimited kilometre warranty including parts and labour. The Vmoto warranty terms and conditions are available at your local authorised Vmoto dealer. Vmoto prides itself on what it considers to be the best parts backup of any motorscooter in Australia, with a commitment to its customers to supply all spare parts including body panels at the lowest possible price, making your Vmoto super cheap to maintain and run in the years to come.

All Vmoto dealerships have onsite service facilities with trained technical staff capable of expertly carrying out all aspects of Vmoto service and repairs. Vmoto service centres also offer the convenience of while-you-wait servicing and loan scooters (subject to availability).

When you purchase a new Vmoto we provide the first two services free of charge, the first service at 300 km and the next at 1000km, these are both while-you-wait services. After these services are every 4000km.

Overall Vmoto has an ongoing commitment to after-sales service, which has resulted in unprecedented levels of customer satisfaction with a large proportion of our sales resulting from referrals from existing Vmoto customers.

Milan Features
 Make a scene on the piazza with the stunningly retro-styled Vmoto Milan Jx50. The ultimate in convenience transportation. Forget the parking hassles and high running costs, the zippy need-valve 50cc engine gives new meaning to the word economy. The classic European styling oozes sophistication and individuality. Electric ignition and the advanced V-Glide automatic transmission make it so simple to ride. No need to kick start or change gears, just hit the throttle and go...

But the best thing...
 No special motorcycle licence is required. You only need a standard A class motor class driver's licence in most states.

Search for a Vmoto Dealer or read the technical specifications.

ATV250 Features
 Vmoto has added some grunt to its ATV range with the 250ATV. With a solid, easy maintenance 4 stroke air cooled engine attached to the 5 speed semi-automatic transmission and shaft drive, this ATV is built to work.

Front and rear carry racks and digital instrumentation make the Vmoto 250 ATV the ideal farm work-horse. Reliable electric start with recoil backup ensure this machine will not let you down.

Generous ground clearance and with Four-ply tyres as standard the Vmoto 250ATV is built for rugged Australian conditions.

Vmoto's legendary parts and service backup make sure your ATV is always working when you need it most.
